Limited 2,000 units available worldwide in commemoration of Olympus 100th Anniversary

Olympus announces silver edition of their revolutionary OM-D E-M1 Mark II camera

Hamburg, 24. January 2019 – In commemoration of Olympus 100th Anniversary in 2019, the company will launch a special silver edition of their Olympus OM-D E-M1 Mark II camera to go on sale in late February 2019 for the same RRP¹ as the black body: 1.699 EUR.

The silver version will be released in a limited edition of only 2,000 units worldwide and feature the same functionalities as the black E-M1 Mark II.

In the camera business, Olympus' philosophy has always been to focus on the personal mobility of their customers with products that feature a compact and lightweight design.

In 2019, the Olympus company not only celebrates its 100th company anniversary, but also the 10th birthday of their first digital camera model with a Micro Four Thirds sensor (Olympus PEN E-P1) – a format that still provides the best basis to offer the most compact and lightweight camera system with image quality that satisfies professional photographers.

To commemorate these special anniversaries, Olympus will release a special silver edition of their revolutionary OM-D E-M1 Mark II camera with a limitation of only 2,000 units worldwide.

Olympus' President Hiroyuki Sasa comments: *"We are sincerely grateful to all customers and other stakeholders who have supported Olympus since its founding 100 years ago. Being true to Our Purpose of "Making people's lives healthier, safer, and more fulfilling", we shall continue to contribute to photographic culture and deliver the joy of capturing and expressing special moments to photography lovers worldwide."*

OM-D E-M1 Mark II Limited Silver Edition: The same revolutionary camera but boasting a classic, quality camera look

The OM-D E-M1 Mark II is a dependable camera that meets professional needs and is capable of shooting in various environments – delivering high-class image quality combined with high-speed performance in a compact but rugged body. While the original black body embraces functional beauty, the new silver body features a classic, quality camera look.
